

Now Hiring: Water System Foreman & Water System Operator

Rio Linda / Elverta Community Water District • Rio Linda, California

The **Rio Linda / Elverta Community Water District** is seeking qualified candidates for two exciting opportunities: **one Water System Foreman** and **one Water System Operator**.

Located just 20 minutes from downtown Sacramento, our community offers a rural setting with convenient access to major destinations while supporting essential public water service.

The District provides drinking water through a dozen wells and is currently designing a treatment facility to remove hexavalent chromium from groundwater. These roles are ideal for candidates who want to build their careers while helping deliver safe, reliable water service to the community.

Position Overview

Both positions work under the general supervision of the Water System Manager, who reviews work for conformance to established standards and procedures. The Water System Operator role does not ordinarily include supervision responsibilities, while the Water System Foreman role may occasionally supervise staff and field activities.

Category	Water System Foreman	Water System Operator I / II
Pay Scale	\$43.66 to \$53.12 hourly	\$35.14 to \$49.62 hourly
Minimum Licenses	Grade 3 Distribution (D3), Grade 2 Treatment (T2), Backflow Prevention Assembly Tester within six months and California Driver's License.	Grade 1 Distribution (D1), Grade 1 Treatment (T1) within 6 months, Backflow Prevention Assembly Tester within six months and California Driver's License.
Minimum Experience	Three years operating a water utility or Four years underground construction.	One year operating a water utility or Two years underground construction.

Typical Responsibilities

- Operate, maintain, and support the District's water system and related equipment.
- Perform water quality testing and assist with regulatory reporting requirements.
- Support construction and maintenance work, including trenching, pipe repair, laying pipe, and backfilling.
- Install and maintain pumps, valves, mains, services, meters, and other distribution facilities.
- Operate vehicles and equipment such as pumps, a vacuum trailer, backhoe, and dump truck.
- Read meters, restore or disconnect services, and help resolve customer service issues.
- Use construction tools and machinery safely while performing sustained manual work and lifting heavy objects.
- Respond to rotating on-call and emergency assignments and be able to arrive on site within 45 minutes.

How to Apply

Visit the **Rio Linda / Elverta Community Water District Employment Opportunities** page to download an application, review the position descriptions, and learn more about the District. Applicants may apply for both positions and, if qualified, may be interviewed for both, but only one position may be offered to a selected candidate.

- A signed District employment application is required to be considered.
- District Office: 730 L Street, Rio Linda, CA 95673
- Phone: (916) 991-1000
- Email: questions@rlecwd.com

Filing Closing Date

The filing period will remain open until a sufficient number of applications have been received to support the selection process. The District will not close the filing period any sooner than **July 31, 2026**.

Qualified applicants will be contacted to schedule an interview.
